Section I

Event Title	QCS 2027: ACM SIGARCH International Conference on Quantum Computing and Systems
Acronym	QCS 2027
Event Type	Conference
Frequency	12 Months
Meeting Dates	10-Jun-2027 - 11-Jun-2027
Total days of event	1.5
URL	https://arcm.csc.ncsu.edu/~mueller/qcs/
Exhibits	No

Responsible SIG sub-unit/percentage

SIG	Percentage
SIGARCH	100%

Other s

Sponsor	Percentage
SIGARCH	100%

Facility

Name of Facility:	FCRC
City:	Atlanta
State/Province:	GA
Country/Region:	USA

Provide a brief outline of topics to be covered - this description will be displayed in ACM's Digital Library.

The ACM International Conference on Quantum Computing and Systems is the primary ACM venue on quantum systems with a focus on architecture, systems, programming languages and compilers, design automation for quantum computing.

Who is your anticipated audience?

Academia, industry and reseachers from labs in quantum computing.

How will papers be solicited?

Web site, CFP flyers at venues and mailing lists

How will papers be selected?

Double blind review process

Will there be a best paper(s) award?

Tutorials

Will there be tutorials? NO

How many full-day?

How many half-day?	

Proceedings

Will proceedings be published?	YES
Is this part of an approved PACM series?	NO
If yes please name:	
What will the number of pages be?	450
What is the maximum number of papers?	36
What is the maximum number of pages per paper?	10+references
Produced by ACM?	YES
Sold by ACM?	NO
Sold by other organizations?	NO
Copyright held by ACM?	YES
If No, who will hold copyright?	

Newsletter

Will this be a SIG newsletter?	NO

CD-ROM

Will there be a Proceedings CD-ROM?	NO
Sold by ACM?	NO
Sold by other organizations?	NO

Technical Sessions

Will technical sessions be recorded?	NO
Will technical sessions be videotaped?	NO

Other products

Will there be other conference products?	NO
If yes, please list	

Section III

Revenue Assumptions

- surplus for 100-200 attendees, even if 3:1 students-to-full ratio - conservative estimate on early registration, only

Expense Assumptions

- based on FCRC input from ACM
